Dear Tina,

Thank you for coming back to me and for your feedback. I shall certainly reach out to Jeff to discuss.

Kind regards,
Georgina

***** External email: use caution *****

Thank you for reaching out Georgina. This is not really a fit for the research side. I think Rose's original suggestion to reach out to Office of Pollution Prevention and Toxics (OPPT) is correct. The Acting Director is Dr. Jeff Morris (Morris.Jeff@epa.gov).

Regards,
Tina

Subject: RE: Speaking Invitation - ELGI Biocides Forum

Dear Tina,

I hope that you are well and don't mind me reaching out to you over email.

I have been recommended to get in touch with you by your colleague Rose Kyprianou of the Office of Pesticide Programs. I am currently working on the ICIS & ELGI North American Industrial Lubricants Congress taking place 12-13 September in Chicago.

As part of this year's program we have a strong focus on the regulation impacting the sector, particularly in terms of the biocides market. During my research the industry were very keen to hear a perspective from the EPA, and so I wanted to reach out to understand if you would be interested to join either a panel discussion, or to give a paper at the event?

Please find attached a copy of the current program for the conference and a link to the event website. I have also copied below the topic for the panel and a presentation topic which I thought may be of interest:

<https://www.icisconference.com/lubricantsusa17>

Panel Discussion: Treatment and disposal of metalworking fluids

- Selecting the appropriate disposal method in light of the regulatory classification of the waste
- Factors to consider – regulation, environment, cost
- Challenges and opportunities – looking to the future

OR

Metalworking fluids – Analyzing the priorities in the biocides market

- What is the future of formaldehyde?
- Performance and reliability advantages of biocides in water-based applications
- Salt registrations – interpreting regulation and implementation

Please note the topics above are only suggestions. I would be happy to discuss amendments or alternatives to best reflect your current projects and priorities.

I would be delighted to include the EPA within the speaker program for this year's event so do hope that you are in a position to join us.

It would be much appreciated if you could come back to me with your initial thoughts and feedback on the opportunity and we can then discuss further.

If you do have any questions please do let me know and I look forward to hearing from you shortly.

Kind regards,
Georgina

Subject: RE: Speaking Invitation - ELGI Biocides Forum

Hi Georgina,

Thank you for the invitation, but I am going to decline. My office (Office of Pesticide Programs) covers the registration of pesticides that are used in metalworking fluids to preserve them, but I suggest you should reach out to EPA's Office of Pollution Prevention and Toxics (OPPT) in an industrial context for use and disposal of metalworking fluids. See <https://www.epa.gov/aboutepa/about-office-chemical-safety-and-pollution-prevention-ocspp#oppt> for information about that office. Also, if you are interested in the formaldehyde slant, I suggest you reach out to EPA's Office of Research and Development, IRIS program (<https://www.epa.gov/iris>), which is currently reassessing formaldehyde. Here's their organizational chart: <https://www.epa.gov/aboutepa/organization-chart-national-center-environmental-assessment-ncea>.

My Best,

Rose
